

Middlecase

About:

From font and graphic designer Morice Kastoun, Middlecase is an experimental typeface that fuses both upper & lowercase letterforms into one unique character set. It is a completely radical idea that blurs the boundaries of font case classification, and what is possible in font design. This font is sure to stand-out from the crowd!

Middlecase comes in 4 weights: Regular, Medium, Bold & Black, with two variations of each; Inline & Solid. Each font comes with over 30 icons within the glyph set.

Terms of Use

Middlecase can be used for personal use only. If you would like to use this font for commercial purposes, a donation is required via my paypal account morice@y7mail.com
